

## ALL ABOUT MY STUDENT

*“Educators need to hear upfront the difficulties in the scenarios of their lives outside of school and how they are being managed. This is WHY we need to collaborate and make the effort to go the extra mile for this child” - Parent.*

Developing a relationship with the student is a vehicle for teaching:  
Consider what questions you might like to ask to establish a relationship with your student.

What values does the student need from their teacher	Reassurance	Order	Calmness	Other
How does your student communicate	Wellbeing	Anxiety	Frustration	Other
What is your student's carrot?	Motivation	Reward	Special Interest	Other
How can your student's parent/carer assist you?	Communication	Motivation	Consequences	Other
What do you need to learn from your student?	Behaviour is communication – what are you trying to say?	What motivates you to learn?	How can I best support you?	Other
What more do you need to know?				

*“Parents need to know a typical week at school, so they can see where their child can be set up to succeed and where they can see some thought and planning might be needed “ - Teacher*
