

Using the Growth model below – let's scaffold a way to work through any issues or concerns that may be happening for our student. Share your completed sections with your student's parent, and combine to complete the chart.

G	GOAL	What do we want to work on? What is the biggest issue right now?	
R	REALITY	Consider what is happening in my student's life that could be impacting?	
	REALITY	Where is my child when this is happening (school/home/both)? How are we (parent/teacher) responding to this?	
O	OPTIONS	What are our options? Ask, how could we adapt this to work at home/school?	
	OPTIONS	Is there a different approach that may work?	
W	WILL	What will we do? Decide what approach will be taken.	
T	TACTICS	How will we do this?	
H	HABITS	How will we know that this works? Let's check in a week/month to see how we are going and how we can embed this if working well in other areas of learning and support for our student.
